DETAILED ACTION

Response to Amendment

1. The amendment filed on 4/4/2007 has been entered. The drawings filed on 9/28/2006 are approved. The amendment to the specification filed on 9/28/2006 is approved.

Response to Arguments

2. Applicants amendments to the claims and arguments are persuasive to overcome the 35 USC 101 and 112 rejections set forth in the office action mailed on 7/6/2006. However, it is noted that new claims 25 and 26 claim new matter and are rejected in the following 35 USC 112 first paragraph rejection.

Specification

3. The abstract of the disclosure is objected to because it should discuss in a graphics image data file graphically defining a plurality of explosion parameters of the video particle explosion effect. Correction is required. See MPEP § 608.01(b).

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The title should express method and apparatus for graphically defining a video particle explosion effect.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 25 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 25:

The specification fails to convey to one of ordinary skill in the art the following claim limitation at lines 2-3 of claim 25: "attributing a shade of a same color to each pixel of said plurality of particles, an average value of said shade for each said particle determining said parameter". Refer to paragraphs [041] to [045] of applicants specification.

Claim 26:

The specification fails to convey to one of ordinary skill in the art the following claim limitation at lines 6-8 of claim 26: "attributing a shade of a same color to each pixel of said plurality of particle, an average value of said shade for each said particle determining said parameter". Refer to paragraphs [041] to [045] of applicants specification.

Allowable Subject Matter

7. Claims 11-24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest in a graphics image data file graphically defining the plurality of explosion parameters which allows a sequence of object data sets to be generated which allows a video particle explosion effect to be rendered.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bregler et al, US Patent No. 6,888,549, teaches using a source graphic data file to control the animation of a target graphic data file and this patent's provisional application supports this teaching.

Dorrell, US Patent No. 6,714,202, teaches encoding animation instructions into a graphics image data file.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

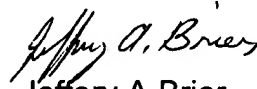

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2628

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
